About COS Pivot

Free trial access →

FUNDING OPPORTUNITIES

- Comprehensive global source of funding opportunities
- Billions of dollars in funding and growing

PRE-POPULATED SCHOLAR PROFILES

- Your institution's profiles matched against funding opportunities
- Find collaborators from among 3 million profiles worldwide

COLLABORATIVE WORK FLOW

- Connects research development professionals and faculty
- Cultivate essential partnerships and alliances

Intelligent Mapping Tools leverage expertise to propel research uniquely targeted to your organization.

EDITORIAL INTEGRITY

- Funding opportunities updated daily
- Our editorial team covers over 11,500 sponsors, both national and international

ONLINE MONITORING AND TRACKING

- Monitor and track opportunities to receive the latest updates

The screenshot shows the Loughborough University COS Pivot interface. At the top, there is a navigation bar with the university logo and links for 'Welcome, C Majewski', 'claim profile', 'my account', and 'sign out'. Below this is a search bar and a 'Select your profile' section with '1 matches'. A modal dialog box titled 'Claim your profile' is open in the center, containing the text: 'The claim profile tool will open in a new browser tab or window. Once you have completed the steps to claim your profile, close the tab or window to return to the current page in COS Pivot.' An orange arrow points to the 'Continue' button in the dialog box. The background interface includes a search bar, a 'Your name' field with 'C Majewski', and a 'Search' button. At the bottom, there is a footer with the pivot logo and copyright information: '© 2011, ProQuest, LLC All rights reserved'.

Other Information

Thank you for your interest in editing your COS Scholar profile. The information that is contained in your profile comes from public sources of information, such as your university's website, databases of publications, and other vetted sources. We welcome your input to augment and update the information displayed.

Use the following feedback forms to tell us about changes to your name, email address, webpages, degrees, affiliations, and other information. If you do not have an online CV or publications page, you can upload either of these as a document or pdf. All changes are reviewed before being added to your profile.

For more information on your profile, please contact the [Profile Help Desk](#). Visit [RefWorks-COS.com](#) for information on our products and services.

COS Scholar Feedback: Welcome Roger Smith

[Welcome](#) **[Names](#)** [Email Addresses](#) [Webpages](#) [Degrees](#) [Affiliations](#) [Publications](#) [Other Information](#)

Our publication linking process begins with your name. If you have published under different names, by providing us with your former names or different versions of your current name that you use professionally, we can do a better job of linking publications to your profile.

Note that we automatically truncate your name and use common nicknames when attempting to link publications to your profile, so it is not necessary to add obvious variations of your name. For example, if your name is Anthony, it is not necessary to add "A." or "Tony" as variations of your first name.

Current Names

★ **Smith, Roger**

Add another name that you currently use professionally or in publications.

Last , First Middle

Former Names

Add another name that you previously used professionally or in publications.

[Ravoo, Bart Jan](#), Assistant Professor, [Supramolecular Chemistry and Technology, University of Twente](#)

From Publication Abstracts: Dendrimers are versatile building blocks for "bottom-up" **nanofabrication** because they combine molecular structure and nanoscale dimensions. Moreover, dendrimers can be functionalized.... This Frontier highlights the potential of metal containing dendrimers for **nanofabrication**.... for **nanofabrication**, for example in combination with electroless deposition of metals and by means

[Fallnich, Carsten](#), Institut fuer Angewandte Physik, [Universitaet Muenster](#)

From Publication Abstracts: -based **nanofabrication** technologies. (Author)...-based **nanofabrication** technologies.

[Fekete, Sandor P.](#), Professor, [Algorithms, Technischen Universität Carolo-Wilhelmina zu Braunschweig](#)

From Publication Abstracts: We introduce staged self-assembly of Wang tiles, where tiles can be added dynamically in sequence and where intermediate constructions can be stored for later mixing. This model and its various constraints and performance measures are motivated by a practical **nanofabrication** scenario through

[Sumper, Manfred](#), Professor, [Arbeitsgruppe Prof. Dr. Manfred Sumper, Universität Regensburg](#)

From Publication Abstracts: Diatoms are encased in an intricately patterned wall that consists of amorphous silica. Species-specific fabrication of this ornate biomineral enables taxonomists to identify thousands of diatom species. The molecular
